Cafeterias or indoor rooms (e.g. breakrooms, classrooms)

A close contact is any adult or student who was within 6 feet of a person with COVID-19 infection for 15 minutes or more over a 24-hour period where people were eating and drinking and not wearing masks.

within 6 feet
15 minutes or more and NOT wearing masks

within 6 feet
15 minutes or more and NOT wearing masks

All-class close contact situations

Examples where all persons in the class would be considered close contacts.

- Cohorts in classrooms that spend the entire day together and interact with others within the cohort (typically younger grade levels).

- Classrooms that do not have assigned seats and/or students are frequently moving around in class.

- Cohorts that engage in activities that may increase the risk of transmission while indoors (e.g., eating and drinking, singing, playing brass or woodwind musical instruments).
### Vaccinated

#### No symptoms

- If you do not have symptoms, you do not need to quarantine.
- Should get tested 3–5 days after your last contact* with the person with COVID-19, even if you don’t have symptoms.
- Watch for symptoms for 14 days after your last contact with the person with COVID-19.

#### Symptoms

- If you develop symptoms, immediately self-isolate and get tested.

### Not Fully Vaccinated

- Get tested immediately for COVID-19, even if you don’t have symptoms.
- You must remain at home in quarantine for 10 days after your last contact* with the person with COVID-19, even if you test negative.
- If your test is negative, you should get tested again 5–7 days after your last contact with the person with COVID-19.
- If your test is negative, immediately self-isolate and get tested if you develop symptoms.
- Watch for symptoms for 14 days after your last contact with the person with COVID-19.

### Returning

Students and staff can return to school when both of the conditions are met.

- 10 days have passed since last close contact with the person with COVID-19.
- No symptoms.

*If you have ongoing close contact with a person with COVID-19 because you live in the same house, you must stay home in quarantine for 10 days after the person with COVID-19 is released from isolation.

### Contacts of close contacts

People who were not in close contact with the person with COVID-19.

- Do not have to quarantine.
- Do not have to get tested.
